25th June 2018

What's going on this week?

For most young people gaming is an enjoyable hobby and a way to spend time with friends. But, for some, it can become more than that. Gaming addiction has been listed as a mental health condition for the first time by the World Health Organisation.

Things to talk about at home...

-  Do you play on computer games? Why do you like/not like computer games?
-  Do you think that some people spend too long playing games?
-  Do you think that there should be a minimum age to play on computer games? Why and if you do, what age do you think it should be?
-  Whose job do you think it is to make sure that children and young people don't spend too much time playing games? Adults at home, or do you think the people who make the games?

Please note any interesting thoughts or comments here...
